

# 2024 National Carer Survey

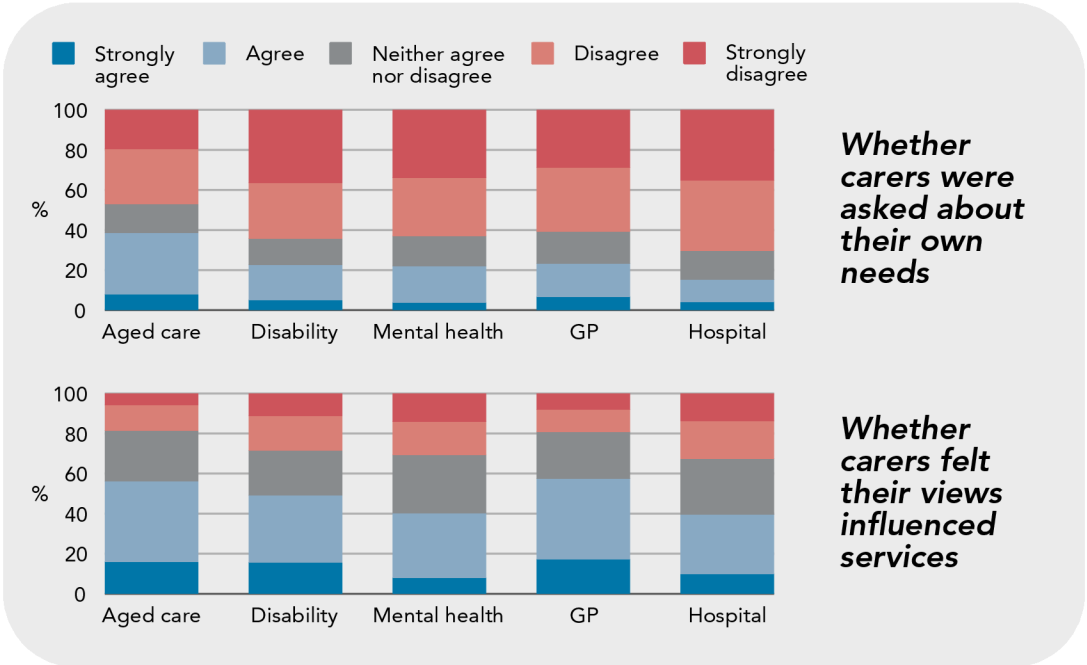

## New South Wales Highlights

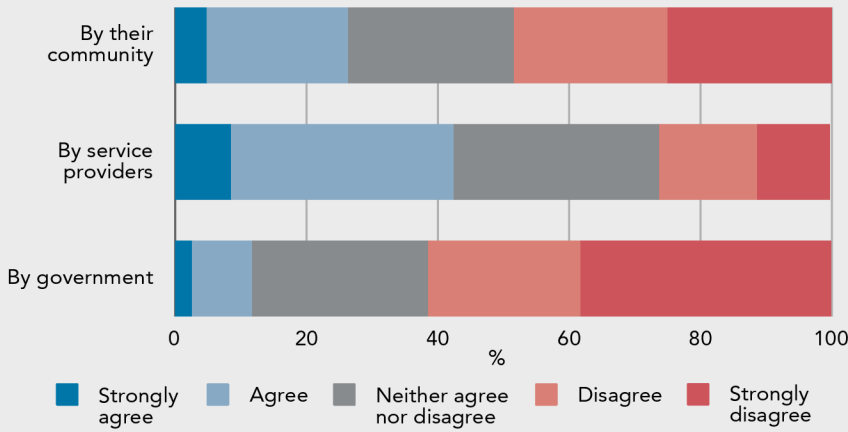

The 2024 National Carer Survey results tell us a lot about carers' day-to-day experiences, support needs and perspectives on caring. Below are some of the key findings from New South Wales so far.

*“What happens when the carer needs care? I have tried every avenue but to no avail. Which is really frustrating and heartbreaking.”*

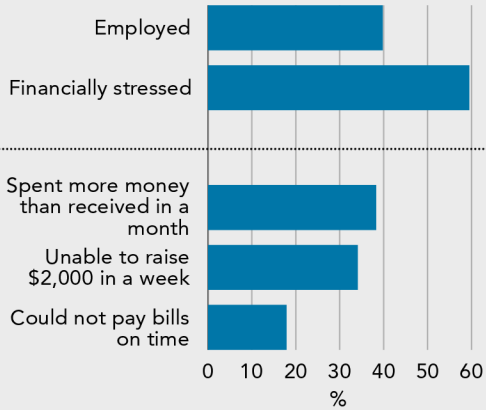

### How recognised and valued carers feel

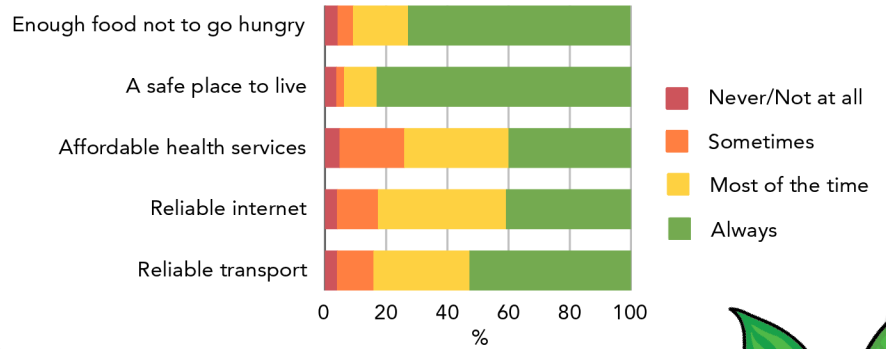

*“Wider recognition of informal supports is really important...I want there to be more awareness in society at large about the labour that goes into caring for loved ones.”*

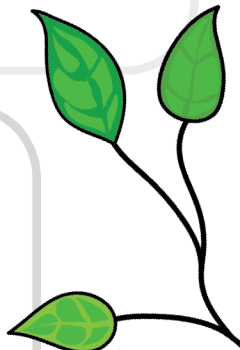

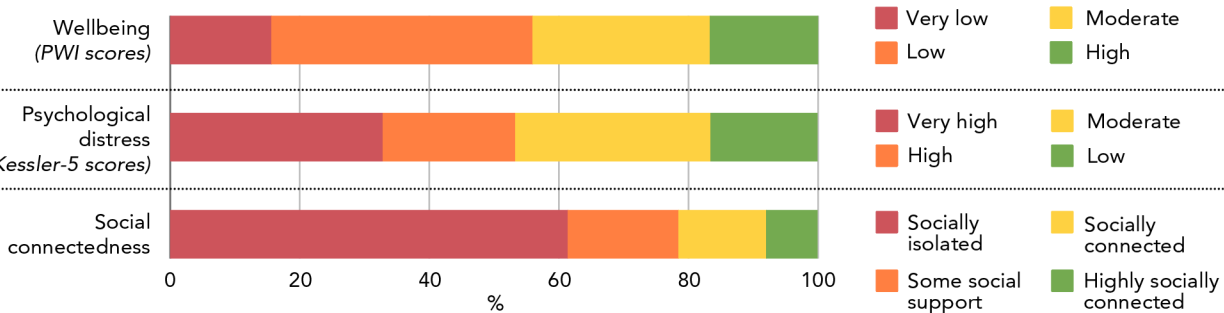

### Financial experiences

### Whether or not basic needs are met

### Wellbeing, psychological distress and connection

*“It gets frustrating looking after people when there is no one looking after me...I want them to have the quality of life they deserve at this point in their lives, but I would also like to feel like my needs are being met also.”*

The National Carer Survey is an initiative of Carers NSW in partnership with the other State and Territory Carer Organisations. The Survey is proudly funded by the NSW Department of Communities and Justice (DCJ).
