

## Western Australia Highlights

The 2024 National Carer Survey results tell us a lot about carers' day-to-day experiences, support needs and perspectives on caring. Below are some of the key findings from Western Australia so far.

*"I feel hopeless. There's lots of talk of help, but red tape or requirements needing to be met mean I can't access the help I need."*

### How recognised and valued carers feel

*"...as it is my husband that I care for, the expectation by non-family is that I should automatically assume that role without specific acknowledgement or recognition of the amount of time and care that is required and involved."*

### Financial experiences

### Whether or not basic needs are met

### Wellbeing, psychological distress and connection

*"Caring is rewarding and challenging. I have learned so much as a carer and I am now working with carers to educate them and help them to transform their carer experience through better understanding of themselves and awareness of others."*

The National Carer Survey is an initiative of Carers NSW in partnership with the other State and Territory Carer Organisations. The Survey is proudly funded by the NSW Department of Communities and Justice (DCJ).
